

Update on Agile BI Progress

Jake Cornelius March 2, 2010

Agile BI Initiative

Closed loop design environment for building end-to-end BI solutions

 Seamlessly integrates ETL, metadata modeling and data visualization

Quick, iterative approach to building BI solutions.

Dramatically reduces license fees

Faster time to value – insight in minutes vs. months

 Reduce risk associated with projects cobbled together from multiple vendors

Delivered as plugins to Pentaho Data
 Integration

Learn more at the <u>Agile BI Home Page</u>

What's Left for Phase 1?

- New Model Flow
- Content Publishing
- Cleanup
 - Hide unnecessary UI elements
 - Progress Indicators
 - Menubar organization
 - Bugs, Bugs, Bugs...

Publish X
Publish the current model to a BI semetadata within the selected folder. File Name [Model 2

The Road Ahead

- Star/Snowflake Schema Support
- Top down modeling using generated sample data
- Iterative Model refinement through Wizards
- Thin client, cloudy wizard for Evaluating Pentaho using your Data
- Data Warehouse Template generation
- PDI Plugins for related activities
 - Data Lineage
 - Data Profiling
 - Data Quality
